

ACCURATT is an Official Joint Analytical Systems (JAS) Distributor

Accuratt Offers a wide range of Solutions based on Agilent Technologies Platform: Gas Chromatography 8860, 8890 systems and Liquid Chromatography 1260, 1290, GCMS, GC-TQ, LC-TQ. JAS has over 40 years of experience customizing Agilent Technologies gas chromatographs to become guaranteed, turn-key analytical systems.

We offer standard and custom turn-key systems for a wide variety of applications. Contact us for any inquiry: khalid.tafrasti@accuratt.com

Accuratt provides total solutions for Hydrocarbon Processing Industry [HPI] according Standardization:

- LPG Analysis
- GAS Analysis
- Naphtha, Gasoline Analysis
- Mid-distillates Analysis
- VGO, Lube Oil and Wax Analysis
- Crude Oil and Residual Analysis
- Elemental Analysis
- Impurities Analysis
- Trace Analysis
- Environmental Analysis

JAS provides a full range of Analyzers for the Oil and Gas Industry based on Agilent Technologies Platform

JAS MACH RGA with Trace CO, CO₂ and JAS Gas Bag Sampler (GBS)

The JAS GBS allows automated sampling of gases, stored in tedlar bags or gas sampling balloons, as well as gas cylinders, e.g. calibration gas cylinders.

Sample transfer is carried out via a multi-position valve. Each gas sampling inlet is equipped with an in-line filter to avoid multi-position valve blocking. Connection to the GC can be made by means of 1/16" SS tube.

The GBS is controlled via a special JAS Control Software.

JAS AED

The JAS AED III is a great number of specific elements within any volatilized compound (except helium the only commercially available Atomic Emission Detector for gas chromatography).

The AED allows you to detect a , the carrier gas) at picogram level sensitivity, with excellent selectivity

JAS Sulfur Analyzers

JAS offers a complete range of Sulfur analyzers according to ASTM, ISO, UOP methods using the best available hardware available, with a wide range of injection methods and peripherals, JAS covers full range of detectors: FPD, PFPD, SCD and AED. Additionally, we offer standards and chemicals for the complete package of analysis.

Custom Solution

JAS is a master in providing bespoke solutions for every industry. The talented German team at JAS in Moers have been excellent in providing out-of-the-box solutions. The customization team has done several projects in cooperation with other suppliers and other companies to achieve the impossible. Do you want to know if your idea can be turned to a reality, please contact us for a detailed plan and offer for your custom solutions.
